Wilhelm Schmidlin AG

ABB

3892481

individually swiss made

Wilhelm Schmidlin founded Switzerland's first and only steel bathtub factory in Oberarth in the canton Schwyz in 1947. In 1985 the company was taken over by Eduard and Margrit Wullschleger-Schmidlin. It has been managed since 2007 by the third generation of Beat Wullschleger and Urs Wullschleger.

Wilhelm Schmidlin AG is committed to Switzerland as a manufacturing base. It is constantly investing in production and development so that it can continue to manufacture innovative Swiss products in the future. Schmidlin is the epitome of traditional, top-quality Swiss products.

Quality products

Quality and sustainability go hand in hand for us. This is why we use the natural raw materials steel and enamel to produce our washbasins, shower bases and bathtubs. Sturdy, long-life and recyclable products with a unique surface finish are manufactured from these basic materials in our production facilities.

A Schmidlin product is a decision for the future.

The advantages of glazed titanium steel

- Strong and resistant
 - Hygienic and easy to clean
 - Color- and lightfast
 - Optimum thermal conductivity
 - Long life guaranteed
-

Our unbeatable strengths

Products and material

Schmidlin produces a wide assortment of bathtubs, shower bases, washbasins and accessories, all made of its premium glazed titanium-steel material. The surface of Schmidlin's glaze is harder than marble, acrylics and other solid surfaces. It is non-porous and resistant to abrasion, heat and UV-rays. Our steel manufacturing plant gives us great flexibility to fulfill customer requirements. We are able to produce to the measure with very short lead times.

Made to measure

Schmidlin is able to produce to the measure. Products with the VARIO appendix are always made to measure. On the VARIO washbasins we are offering a special airfreight delivery option directly from the Swiss factory.

Integrated tile flanges

Schmidlin offers integrated tile flanges on 3 sides for a waterproofed installation in the alcove. Further to this Schmidlin also offers tile flanges on 2 sides for a corner installation. This innovation is unique on the market and it gives layout flexibility to the planner.

Integrated tile flange

Magnetic accessories

Due to the nature of our base material (steel) all our products are magnetic. For this purpose, we developed a wide assortment of magnetic accessories.

Colors

Schmidlin offers its products not only in glossy white. The outstanding surface properties of glazed titanium steel can also be offered in several colors and in matte shades of gray and black.

Glazed titanium steel

Quality and sustainability go hand in hand for us. This is why we use the natural raw materials steel and enamel to produce our washbasins, shower bases and bathtubs. Durable, sturdy, long-life and recyclable products with a unique surface finish are manufactured from these basic materials in our production facilities.

Strong and resistant

Our products are made from titanium steel, making them extremely tough. The combination of steel and enamel produces a very resistant surface known as glazed titanium steel.

Hygienic and easy to clean

The inorganic surface provides no breeding ground for bacteria. The brilliant glazed surface is skin-friendly and easy to clean.

Color- and lightfast

Our products are colorfast, lightfast and 100% UV-light resistant. At the same time, the very smooth surface reflects light very evenly.

Optimum thermal conductivity

Steel has a very good thermal conductivity and quickly assumes the temperature of the water or ambient air. When the water starts to cool down, the steel releases the stored heat to slow this process down.

Long life guaranteed

The long service life speaks for itself. We grant a 20 year warranty for manufacturing defects on all of our bathtubs, shower bases and washbasins. Please refer to the limited warranty document:
www.schmidlinusa.com/media/download/3572

Production

How is a Schmidlin bathtub made?

Raw production

Titanium alloy steel plates are deep drawn down to 17¾ inch in a deep drawing press at a pressure of over 600 tons; this gives the steel tubs their inner shape. After cutting to shape the edges are turned up, beaded and the outlet and overflow holes are then punched and stamped. The tubs are checked and finish-ground before being degreased in the pre-treatment installation. The blanks are now ready for enamelling.

Enamelling / glazed titanium steel

The steel bathtubs are given their brilliant, scratch and acid-resistant surface by enamelling. Enamel is glass. The enamel frit is mixed and ground with water and clay. The resulting enamel slip is sprayed onto the steel tubs then wet and fired at 1560° F in a continuous furnace. The ground coat enamel bonds with the steel to form a composite material. A second layer of enamel gives the tubs their color and incomparable surface properties of glazed titanium steel.

Inspection, storage and delivery

A twofold final inspection guarantees that no faulty tubs are supplied. The finished steel bathtubs are now packed and stored or made ready for direct delivery to the sanitary wholesalers.

Nice and neat

Schmidlin MERO EVO

Add built-in bathroom furniture to the Schmidlin MERO washbasin and you get the Schmidlin MERO EVO. Made from glazed titanium steel, the lateral lines of the washbasin stylishly frame the drawer, harmoniously blending it with the basin. The Schmidlin MERO EVO is available in a wide range of sizes and designs and is made from timeless, high-quality materials. The elegant drawer has a quiet and practical soft-close mechanism and can be opened easily thanks to its push-open system. This timeless bathroom vanity is available in two materials: real wood laminate or super matte synthetic resin laminate with a fingerprint-resistant surface.

The Schmidlin MERO EVO can also be fitted with practical accessories, such as a magnetic towel holder on the side of the basin or an interior compartment for the drawer, made from solid wood with a black varnish.

Subtle and attractive

The slender Schmidlin IRIS bowl combines subtle design with sturdy materials. The basin's discreet drain produces a pleasing sense of evenness, which when viewed from above resembles the human eye. Schmidlin IRIS is available in two sizes and a wide range of colors. Like the basin, the large, slightly convex lens is made from glazed titanium steel and comes in a wide range of colors. You can choose different colors for the bowl and the lens – to create something that's truly pleasing on the eye.

Rounded relaxation

Harmoniously curved and elegantly shaped. A classic oval, flowing and gentle. This is the interior profile of the Schmidlin RIVA. The flowing form of the internal casing creates an unexpected softness in the bathroom and guarantees a sensuous bath experience.

A framed work of art

There is something sculptural in the character of the Schmidlin FRAME Line. The bathtub, Schmidlin RIVA FRAME, and the washbasin, Schmidlin DUETT FRAME, are characterized by a flowing oval design. They are elegantly shaped and supported by a classic powder-coated steel frame.

Oval classic

Schmidlin FLAIR helps give your bathroom an elegant simplicity. The exterior stays true to the oval interior. With a central drain outlet, the bathtub guarantees a relaxing, enjoyable bath for two people.

Schmidlin SELLA SHAPE

Uncompromising aesthetics in a classic oval: the gentle, flowing forms of the internal casing and the conical outer shape give the SELLA SHAPE a particular lightness. The graceful looks are an impressive compliment to the sturdy

glazed titanium steel. The high intrinsic value of the seamless freestanding bathtub convinces all across the board. The ergonomic internal casing and the spacious overall tub promise pure relaxation.

Shower bases

03

Picture: Schmidlin shower base super flat 60 × 30 x 1 3/8 inch, drain right.

The Schmidlin shower bases in a classic design are available in a wide variety of sizes and different depths: super flat (1 3/8 inch deep) or flat (2 5/8 inch deep). The shower bases are available with integrated tile flanges on three sides and an apron at the front. Optionally, the

shower bases can also be ordered with tile flanges on two sides and aprons on the other two sides. This solution spares complicated tiling work and stands out through its elegance and perfection.

Picture: Schmidlin VERTEX ALCOVE 42 × 30 x 1 3/8 inch.

With its clean, simple lines, the Schmidlin VERTEX ALCOVE is the epitome of fine style. Schmidlin VERTEX ALCOVE fits flush with any bathroom floor. The slope to the central

drain is hardly noticeable, but it allows the water to drain quickly.

ANTIGLISS

You can be sure of a firm stand and footing with the new Schmidlin anti-slip protection ANTIGLISS which is standard on all Schmidlin bathtubs sold in North America. The tested anti-slip solution convinces through its look and anti-slip function.

Schmidlin ANTIGLISS is extremely tough and hard-wearing at the same time it is easy-to-clean and hygienic. Schmidlin ANTIGLISS is the ideal for anyone who places great value in safety and hygiene.

Schmidlin ANTIGLISS provides a firm stand and footing in all bathtubs. The proven anti-slip protection is a special quartz sand that is permanently stove-enamelled into the surface. This anti-slip area is hard-wearing, foot-sure and hygienic.

CLEANEFFECT

Your bathtub or washbasin is even easier to clean with the water and dirt-repellent Schmidlin CLEANEFFECT. Water drops run off faster so that dirt has no chance to stick to the glazed titanium steel.

CONTURA

SAFE

Grab bars

Grab bars help you get into and out of the bathtub safely. Most Schmidlin bathtubs can be fitted with chrome-plated Grab bars.

Freestanding towel holder
FRAME

Ladder towel holder
FRAME

FRAME Line accessories

The freestanding towel holder FRAME and the ladder towel holder FRAME are made of a classic powder-coated steel structure.

Schmidlin back- / side-splash

The Schmidlin backsplash is a timeless option for those who want to combine contemporary design with functionality. The extremely thin material thickness allows endless furnishing variations.

Undermount towel holder

The simple, high-quality towel holder, is a clever and reliable solution for our smallest washbasins. The chromed towel holder for MINI wall-mount washbasin is available in a length of 15 ½ inch.

Tissue paper dispenser

A tissue paper dispenser is optionally available for wall-mount washbasins. Any conventional tissue box of approx. 8 7/8 × 7 5/8 inch can easily be fixed in the holder. A dispenser hole in the frontal apron of the washbasin with a diameter of 2 inches allows you to withdraw tissue paper.

Schmidlin built-in soap dispenser

A timeless, classic built-in soap dispenser, chrome-plated. Matches most Schmidlin washbasins. Capacity 8.45 oz.

Magnetic accessories

Round tray

Magnetic, solid, oiled oak

Schmidlin MAGNO and VERSO

VERSO Soap dispenser

The magnetic Schmidlin VERSO soap dispenser, made of black matte glass, stands with its round design, securely on our washbasins and bathtubs.

MAGNO Soap dispenser

The magnetic Schmidlin MAGNO soap dispenser, with its simple rectangular design, stands securely on our washbasins and bathtubs. Available in glossy white with a chrome-plated dispenser or all in matte black.

MAGNO Toothbrush holder

Made from high-quality plastic, the magnetic Schmidlin MAGNO toothbrush holder will stay securely in place. Available in glossy white or matte black.

Schmidlin RELAX bathtub pillow

The magnetic, ergonomically-shaped multifunction pillow comfortably supports head, neck, arms or feet. Its flexible shape easily adapts to any Schmidlin bathtub, thus offering a safe and comfortable support during bathing. Thanks to the integrated magnetic area, the cushion can be precisely positioned anywhere on tubs of glazed titanium steel.

Size: 13 ¾ × 4 ¾ inch
Color: black matte

Brass overflow and drain set for washbasins

The fully brass chrome-plated overflow and drain set can be installed in any washbasins with overflow (except ORBIS MINI and MERO MINI). The set includes a chrome-plated overflow cover and a chrome-plated drain valve 1 ¼ inch with push-open function.

The brass overflow and drain set is UPC certified by IAPMO with all Schmidlin washbasins (except ORBIS MINI).

Drain set for shower bases

The ABS based drain set can be used in any shower base. The set includes a chrome-plated cover.

Heat retention

Heat retention of a glazed titanium steel tub and an acrylic tub is pretty much the same. The glazed steel bathtub loses about 0.5° F in the first 4 minutes after filling the tub. After about 40 minutes, the steel tub loses even less heat than the acrylic tub.

Heat retention of titanium steel tub vs acrylic tub.

Custom products

Schmidlin shower base standard size

Schmidlin shower base made to measure

**There are no special wishes with us,
just wishes – yours.**

We produce our bathtubs, shower bases and washbasins tailored to your individual needs. Custom products from Schmidlin are often the only convincing solution, especially for conversions and renovations. A bespoke shower or bathtub is the perfect solution in terms of design and hygiene; no complicated tiling work is needed. Almost anything is possible: longer, shorter, wider, narrower, custom holes, bevelled or rounded corners, oblique angles and moulded enamelled aprons.

Bathtubs

- Longer or shorter on the head end and/or foot end
- Broader or narrower tub side rim
- Bevelled or rounded corners (with radius of the inner body)
- Custom holes
- Outlet 3 ½ inch

Shower bases

- Longer or shorter shower base rim
- Bevelled or rounded corners (with radius of the inner body)
- Moulded enamel apron

Washbasins

- Longer or shorter washbasins
- Bevelled or rounded corners
- Holes for 3-hole fitting
- Custom holes (e.g. for built-in soap dispenser)

Care and warranty

Care

Glazed titanium steel is glass and needs corresponding care. All glazed surfaces should be rinsed well with water and then dried with a soft, absorbent cloth. Light dirt can be removed with a mild detergent (e.g. washing-up liquid or window cleaner). Leave the detergent for a while to take effect on more stubborn dirt. Rinse well with water and then dry with a soft, absorbent cloth. Lime scale deposits can be avoided by always wiping the surfaces dry after use. Very abrasive, aggressive and acidic detergents should not be used.

Limited Warranty

We grant a 20 year limited warranty for manufacturing defects on all of our bathtubs, shower bases and washbasins. For all other products we grant a 1 year limited warranty.
